

ON-THE-GO EXCELLENCE

4 HOUR CUSTOMIZED TRAINING COURSE

Mastering Mobile Maintenance with LLumin's CMMS+

Course Highlights

Embrace the future of maintenance management with 'On-the-Go Excellence,' a specialized training program focusing on LLumin's CMMS+ mobile application. Tailored for maintenance professionals, this course equips participants with the skills to efficiently manage tasks from mobile devices. Covering installation, setup, and advanced functionalities like work orders and asset management, attendees learn to leverage mobile technology for enhanced field efficiency, accuracy, and decision-making.

Who Should Consider Taking This Course?

Maintenance technicians, field service engineers, and any maintenance professionals who are often on the move or work across multiple locations. It's also beneficial for supervisors and managers looking to streamline their team's mobile operations.

ON-THE-GO EXCELLENCE

COURSE CURRICULUM

Mobile Workforce

- Introduction to the benefits and strategies of mobilizing your maintenance workforce with CMMS+ for increased flexibility and real-time data access.

Installing App and Setup

- Step-by-step guidance on downloading, installing, and configuring the CMMS+ mobile app for optimal performance and usability.

Syncing

- Ensuring seamless data synchronization between mobile devices and the central CMMS+ system to maintain up-to-date information across platforms.

Assets

- *Techniques for accessing and managing asset information on-the-go, including viewing asset details, maintenance history, and associated work orders.*

Ad Hoc Procedures

- *How to perform and record ad hoc maintenance procedures directly from the mobile app, ensuring prompt response to unplanned issues.*

ON-THE-GO EXCELLENCE

COURSE CURRICULUM

Work Orders

- Comprehensive training on managing work orders from the mobile app, including creation, assignment, execution, and closure of work orders in the field.

Condition Assessment

- Guidance on conducting detailed condition assessments using the mobile app, allowing for immediate updates and decision-making.

Labor Time

- Efficiently logging labor hours and tasks performed directly into the mobile app to accurately track time spent on maintenance activities.

Issuing Parts

- *Instructions on issuing parts and materials for maintenance tasks using the mobile app, ensuring accurate inventory tracking and usage recording.*
